

9. **First Hybrid Case of the World of using VENIBRI VALVE (Pre-Crimped) for Aortic Valve Replacement (TAVR) alongwith Stenting of the Main Artery** on Nov, 6<sup>th</sup> 2016 at Metro Heart Institute, Noida by Dr. P. Lal. Pre-crimped ready to use venibri aortic valve of Venus Medtech was used for the First Time In The World at Argentina and the second case of TAVR with Venibri aortic valve was performed at Metro Heart Institute, Noida (Delhi NCR). The patient also underwent Angioplasty with Stenting of her critically blocked main artery (LAD) at the same time in less than 45 minutes. Thus making this hybrid procedure (Venibri TAVR+ PTCA with Stenting of main artery) as the **First Case Of The World.**

**Venibri Aortic Valve, Pre-crimped and ready to be implanted**

**Dr. P Lal with Patient, day after procedure**
